PROFESSIONAL SUMMARY

Frontend Engineer with 2+ years of experience shipping production-grade web and mobile applications across four live surfaces. Built 30+ reusable components, integrated real-time Firebase services, and optimized web performance for thousands of active users. Adept at owning end-to-end UI delivery across React.js, TypeScript, and React Native in cross-functional Agile teams.

EXPERIENCE

Worthit Consultancy Services Pvt. Ltd. | Frontend Engineer / React.js Developer *Mar 2024 - Apr 2026 | Hyderabad, IN*

- Owned frontend development across four live production surfaces — Customer Web (React.js), Customer Android App (React Native), Partner Android App (React Native), and Admin Web Panel (React.js) — serving thousands of active users across customer, partner, and admin workflows within a single product ecosystem.
- Engineered 30+ reusable UI components and modular frontend structures using React.js, TypeScript, and React Native, reducing redundant UI code by ~40% and accelerating feature delivery speed across web and mobile surfaces.
- Integrated 15+ Swagger-documented REST APIs spanning booking, menu selection, payments, order tracking, notifications, and admin workflows; implemented Firebase Firestore real-time sync and Firebase Cloud Messaging, enabling sub-second live order updates and push notifications across web and mobile apps.
- Architected Redux, Redux Thunk, and Context API state management for complex multi-step booking and order flows, eliminating prop-drilling across 3+ component layers and improving debugging efficiency during Agile sprint reviews.
- Optimized web pages using SSR, lazy loading, memoization, and code splitting, reducing initial page load time by ~35% and achieving measurably smoother interactions on high-traffic customer-facing web interfaces.

Saanvika Software Solutions | Frontend Developer Intern *Nov 2023 - Feb 2024 | Hyderabad, IN*

- Delivered 5+ responsive web interfaces using React.js, TypeScript, JavaScript, HTML5, CSS3, and Bootstrap, gaining hands-on experience in component-based architecture and modern frontend development practices.
- Resolved 20+ UI bugs through responsive design fixes and browser-level debugging, improving rendering consistency across Chrome, Firefox, and Safari on mobile, tablet, and desktop viewports within Agile sprint cycles.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, React Native, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, Responsive Design

State Management: Redux, Redux Thunk, Context API, React Hooks

API & Services: REST APIs, Swagger, Firebase Auth, Firestore Real-Time Sync, Firebase Cloud Messaging

Performance & Quality: Accessibility, Cross-Browser Compatibility, Lazy Loading, Code Splitting, Memoization, SSR, Browser DevTools, Code Reviews

Tools & Workflow: Git, GitHub, JIRA, VS Code, npm, Agile/Scrum

PROJECTS

Book My Chef (BMC) — Service Marketplace Platform | React Native • React.js • TypeScript • Firebase • Redux
Contributed as frontend engineer across **4 separate production applications** within a single food-tech ecosystem, serving customers, chef partners, and operations teams at scale.

- Customer App (React Native — Android & iOS):** Built chef discovery, multi-step booking, slot & city selection, menu selection, add-on services, and payment summary flows; integrated 10+ REST APIs with real-time order tracking via Firestore, reducing booking drop-off by improving flow continuity.
- Partner App (React Native — Android & iOS):** Developed order acceptance, real-time in-app chat using Firebase Firestore, and push notification system via Firebase Cloud Messaging; partner order response time improved by ~30% through live status sync.
- Customer Web (React.js):** Implemented SSR pages, dynamic routing, and API-integrated booking flows; applied lazy loading, memoization, and code splitting — reducing initial page load time by ~35% on high-traffic customer-facing routes.
- Admin Web Panel (React.js):** Built booking monitoring, order lifecycle tracking, and operations management dashboards; 20+ reusable components shared across admin views, cutting UI build time for new admin features by ~40%.

EDUCATION & CERTIFICATION

Bachelor of Engineering - Computer Science | Lovely Professional University, Punjab, India *Jul 2023*

Full Stack React Development - Udemy | Firebase & Firestore Fundamentals - Online Certification
