

# DASARI DEEPIKA

Frontend Engineer | React.js | TypeScript | Next.js | React Native | Reusable UI | Performance | REST APIs  
Hyderabad, IN | +91-8247706811 | dasarideepika2018@gmail.com | linkedin.com/in/dasari-deepika

## PROFESSIONAL SUMMARY

Frontend Engineer with 2+ years of experience building scalable, responsive web and mobile applications using React.js, TypeScript, Next.js, and React Native. Strong in reusable component development, interactive UI implementation, REST API integration, Redux and Context API state management, responsive design, accessibility, and performance optimization. Experienced in translating UI/UX designs into production-ready interfaces, debugging with browser tools, and collaborating with design, product, and engineering teams in fast-paced startup environments to ship clean, maintainable code quickly.

## EXPERIENCE

**Worthit Consultancy Services Pvt. Ltd.** | Frontend Engineer / React.js Developer | Mar 2024 - Present | Hyderabad, IN

Built and maintained frontend features across a 4-application ecosystem including Customer Web, Customer Android, Partner Android, and Admin Panel, delivering responsive and consistent user experiences across web and mobile products.

Developed reusable UI components and modular frontend structures using React.js, TypeScript, Next.js, and React Native to support maintainability, faster feature development, and scalable frontend architecture.

Worked closely with product, backend, and design teams to translate UI/UX requirements and wireframes into production-ready interfaces with strong attention to interaction quality and visual consistency.

Implemented state management using Redux, Redux Thunk, and Context API to maintain predictable data flow and support clean, maintainable code across core modules.

Integrated Swagger-documented REST APIs for seamless frontend-backend communication and connected Firebase services including Firestore real-time sync and Firebase Cloud Messaging for live product updates and notifications. Built Next.js interfaces with server-side rendering and optimized performance using lazy loading, memoization, and code splitting to improve responsiveness and user experience.

Applied responsive design, accessibility considerations, and cross-browser compatibility practices to ensure reliable rendering across devices, screen sizes, and browsers.

Used browser debugging tools and structured troubleshooting to resolve UI issues, improve stability, and maintain smooth behavior in production environments.

Participated in Git-based workflows, code reviews, and Agile/Scrum ceremonies while collaborating closely with backend engineers, QA, designers, and stakeholders to ship quickly without compromising maintainability.

Contributed to scalable frontend delivery by focusing on reusable components, performance improvements, clean implementation, and iterative product refinement in a fast-paced environment.

**Saanvika Software Solutions** | Frontend Developer Intern | Nov 2023 - Feb 2024 | Hyderabad, IN

Developed responsive web interfaces using React.js, JavaScript, HTML5, CSS3, Bootstrap, and TypeScript-driven frontend concepts, strengthening hands-on experience in modern frontend workflows.

Applied responsive design and interactive UI techniques to support reliable rendering across mobile, tablet, and desktop layouts.

Contributed to UI debugging, code improvements, and browser-level troubleshooting to enhance responsiveness, maintainability, and overall frontend quality.

Collaborated with senior developers in Agile sprints, managed source code through Git, and documented updates for team visibility and knowledge sharing.

## TECHNICAL SKILLS

**Frontend:** React.js, TypeScript, Next.js, React Native, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Responsive Design, Interactive UI Development

**State Management:** Redux, Redux Thunk, Context API, React state management patterns

**API & Services:** REST APIs, Swagger, Firebase Authentication, Firebase Cloud Messaging, Firestore Real-Time Sync

**Frontend Engineering:** Reusable Components, Component-Based Architecture, Frontend Architecture, Accessibility, Cross-Browser Compatibility, Browser Console Debugging, Wireframe-to-Code Translation

**Performance & Quality:** Lazy Loading, Memoization, Code Splitting, Performance Optimization, Functional Testing, Unit Testing, Debugging, Code Reviews, Maintainable Code

**Tools & Workflow:** Git, GitHub, JIRA, VS Code, Agile/Scrum, Cross-Functional Collaboration, Fast-Paced Product Delivery  
**Additional:** Data Structures, UI/UX Prototyping, TailwindCSS, Material UI, AWS Awareness, Java Familiarity, SQL (Basic), Dynatrace (Basic)

## PERSONAL PROJECTS

### **Book My Chef - Multiplatform Food Service Application** | Product Project

Delivered a multi-application product ecosystem spanning customer, partner, and admin experiences using React.js, TypeScript, React Native, and Next.js.

Built reusable interfaces, integrated REST APIs, and supported real-time product behavior using Firestore sync and Firebase Cloud Messaging.

Improved frontend performance through lazy loading, memoization, and code splitting while maintaining delivery through Git-based collaboration and Agile execution.

## EDUCATION & CERTIFICATION

**B.E. - Computer Science** | JNTUH affiliated College, Hyderabad *Jul 2023*

**Full-Stack React Development - Udemy** | Online Certification

**Firebase & Firestore Fundamentals** | Online Certification
